## All important Options Selling Strategies..

### A thread■:

#### Simple Directional Call Sell

View: Neutral to bearish  
 Limited Profit, unlimited risk.  
 High Probability of profit.  
 High Margin required.

#### Simple Directional Put Sell

View: Neutral to Bullish  
 Limited Profit, unlimited risk.  
 High Probability of profit.  
 High Margin required.

## Call Credit Spread

View: Neutral to bearish  
Limited Profit, Limited risk.  
High Probability of profit.  
Low Margin required.

## Put Credit Spread

View: Neutral to Bullish  
Limited Profit, Limited risk.  
High Probability of profit.  
Low Margin required.

## Short strangle

View: Neutral (Non-Directional)  
Limited Profit, Unlimited risk.  
High Probability of profit.  
High Margin required.

## Short Straddle

View: Very Neutral (Non-Directional)

Limited Bigger Profit, Unlimited risk.

Lower Probability of profit compared to Strangle.

High ROI can be achieved.

High Margin required.

## Short Guts (Inverted Short Strangle)

View: Neutral (Non-Directional)

Limited Profit, Unlimited risk.

High Probability of profit compared to Strangle.

High Margin required but you get higher Premium credit as you are selling expensive deep ITM options

## Bearish Jade Lizard (bearish Ladder)

View: Neutral to Bearish

Limited Profit, unlimited risk Upside.

High Probability of profit.

Low Margin required than short strangle.

## Bullish Jade Lizard (Bullish Ladder)

View: Neutral to Bullish

Limited Profit, unlimited risk downside.

High Probability of profit.

Low Margin required than short strangle.

## Covered Call

U must own 1lot of underlying Shares or Futures.

View: Bullish (but evn if underlying goes slightly lower stil u wont lose money)

Limited Profit, unlimited risk Downside but lower risk compared to only having Long position.

A little Higher Probability of Profit (POP)

## Iron Condor

View: Neutral (Non directional)

Limited Profit, Limited risk

High Probability of profit.

Low Margin required than short strangle.

## Call Condor

It's same as iron condor but made only by calls.

Some times due to inefficient options pricing u get better results in call condor comparatively

View: Neutral (NonDirectional)

Limited Profit, Limited risk

High POP.

Low Margin required than short strangle.

## Put Condor

It's same as iron condor but made only by Puts.

Some times due to inefficient options pricing u get better results in Put condor comparatively

View: Neutral (NonDirectional)

Limited Profit, Limited risk

High POP.

Low Margin required than short strangle.

## Iron Fly

View: Neutral (Non directional)

Limited but better Profit, Limited risk

Lower POP than Iron Condor.

Higher ROI can be achieved using IF.

Low Margin required

## Call Butterfly

It's same as iron fly but made only by Calls.

Sometimes u get better results in Call Butterfly comparatively

View: Neutral (Non directional)

Limited but better Profit, Limited risk

Lower POP than Iron Condor

Higher ROI can be achieved using Fly.

Low Margin required

## Put Butterfly

It's same as iron fly but made only by Put.

Sometimes u get better results in Put Butterfly comparatively

View: Neutral (Non directional)

Limited but better Profit, Limited risk

Lower POP than Iron Condor

Higher ROI can be achieved using Fly.

Low Margin required

## Call 1:2 Ratio Spread

View: Slightly Bullish with No downside risk

High POP.

Higher ROI can be achieved if underlying closes near your sold leg at Expiry.

Low Margin required

## Put 1:2 Ratio Spread

View: Slightly Bearish with No Upside risk

High POP.

Higher ROI can be achieved if underlying closes near your sold leg at Expiry.

Low Margin required

## Calendar Spread

Sell (Put or Call) currnt Expiry

Buy same strike (Put or Call) of next Expiry

View: Neutral

Limited big Profit, lower limited risk.

Higher POP

High ROI Possible

Low Margin required.

If sudden big move comes, Vega of farther expiry will help control the losses.

## Call Diagonal Spread

Sell Call immediate Expiry

Buy the far OTM strike Call of next Expiry

View: Neutral to bearish

Limited Bigger Profit, limited risk (No risk downside)

Higher POP

High ROI can be achieved.

Low Margin required.

## Put Diagonal Spread

Sell Put immediate Expiry

Buy the far OTM strike Put of next Expiry

View: Neutral to bullish

Limited Bigger Profit, limited risk (No risk upside)

Higher POP

High ROI can be achieved.

Low Margin required.

## Iron Condor using Calendar Spread

Innovative Calendar Option writing strategy.

You can read the details in the picture and decide when to use this strategy.

## Iron Condor using Diagonal Spread

Innovative Calendar Option writing strategy.

You can read the details in the picture and decide when to use this strategy.

## Iron Fly using Diaogonal Spread
