Thread■ new ■ doc recieved ■
■Pdf■
https://t.co/1qWSL56c7C

1. HIGHLIGHTS - if I'm reading this correctly looks as if the ■ participants are shedding something. The question is what... Doc mentions exposure that may cause adverse effects to people that never had the ■, when they are exposed to people who recieved ■

2. When such exposures happen, the investigator must report them to Pfizer saftey within 24 hours of becoming aware.

"SINCE THE INFORMATION DOES NOT PERTAIN TO A PARTICIPANT INVOLVED IN THE STUDY, THE INFORMATION WILL BE KEPT SEPARATE FROM THE STUDY."

3. Exposure...(Pg.67-69)
Sec 8.3.5

4. Exposure During Pregnancy- (Pg.67)

5. ■...study intervention due to ENVIRONMENTAL EXPOSURE.

EX 1.) • A female family member or healthcare provider reports that she is pregnant after having been exposed to the study intervention by INHALATION or SKIN CONTACT■■

6. ■...study intervention due to ENVIRONMENTAL EXPOSURE.

EX 2.) • A male family member or healthcare provider who has been exposed to the study intervention by INHALATION or SKIN CONTACT then exposes his female partner prior to or around the time of conception.

7. Since the exposure information DOES NOT PERTAIN TO THE PARTICIPANT ENROLLED IN THE STUDY, the information is NOT RECORDED on a CRF(case report file); however, a copy of the completed Vaccine SAE Report Form is maintained in the investigator site file.

8. Abnormal pregnancy outcomes are considered SAEs. If the outcome of the pregnancy meets the criteria for an SAE (ie, ectopic pregnancy, spontaneous abortion, intrauterine fetal demise, neonatal death, or congenital anomaly)...

9. Exposure During Breastfeeding

10. Occupational Exposure

11. are not evaluated in this study...

12. Adverse Events: Definitions and Procedures for Recording,
Evaluating, Follow-up, and Reporting

13. Definition of SAE

14. Male Participant Reproductive Inclusion Criteria

•Refrain from donating sperm.

15. Male Participant Reproductive Inclusion Criteria

• Be ABSTINENT from heterosexual INTERCOURSE WITH A FEMALE OF CHILDBEARING POTENTIAL as their preferred and usual lifestyle (ABSTINENT ON A LONG-TERM and PERSISTENT BASIS) and AGREE to REMAIN ABSTINENT.

16. "...adequate patient comprehension of this risk is unlikely to occur, obviating truly informed consent by subjects..."
