[thread]

I am going to do a thread on several numbers

1

2,996

4,494

43,730

106,158

Now

We go back into the dim and distant past in British politics

We go back over 2 decades

A lesson from the past

Now I am going to focus on the words of two politicians

Two politicians who have held high offices in this land

And I am going to agree with their words

So those with a long memory

May have already figured out perhaps what I am going to do based on the first two numbers

And you'd be right

So let me get going on the journey

In my first post

I deliberately anonymised those numbers

Let me now give them context

1 Princess Diana or Margaret

2,996 9/11

The final 3 are UK coronavirus death tolls:

4,494 (5th April 2020)

43,730 (30th June 2020)

106,158 (1st February 2021)
