Rs made gains in state legislatures in 2020. Even where manual audits are conducted, they rarely include state races. ■

“Ds spent big to take control of state legislatures but lost their key targets. Now they’ll be on the sidelines as new maps are drawn”

I reported on the sorry state of election auditing laws in the US in this pre-election piece for [@NYRDaily](#). This must change.

#RobustManualAuditsNOW

1/ <https://t.co/mbxFpCpFoQ>

2/ “Earlier this year, ... Republicans blocked federal legislation, the SAFE Act, which would have required such [manual] audits for most federal races.”

3/ “America’s preeminent election-auditing expert, Philip Stark, a professor of statistics at...UCB, told me a few weeks ago that “only a few jurisdictions currently audit elections in a way that has a good chance of catching and correcting wrong reported outcomes.” [@philipbstark](#)

4/ “That requires a trustworthy paper trail—primarily hand-marked paper ballots kept demonstrably secure throughout the election and the audit—and [what is known as] a risk-limiting audit using that paper trail.” #HandMarkedPaperBallots

5/ “But, to the best of my knowledge, even those states only audit a few contests in each election.”

6/ “A report by the National Conference of State Legislators confirms that just three states (Colorado, Rhode Island, and Virginia) require risk-limiting audits for one or more races.”

7/ Screenshot from my [@nybooks](#) piece

Earlier this year, though, Republicans **blocked federal legislation**, the SAFE Act, which would have required such audits for most federal races. America's preeminent election-auditing expert, Philip Stark, a professor of statistics at the University of California at Berkeley, told me a few weeks ago that "only a few jurisdictions currently audit elections in a way that has a good chance of catching and correcting wrong reported outcomes. That requires a trustworthy paper trail—primarily hand-marked paper ballots kept demonstrably secure throughout the election and the audit—and [what is known as] a risk-limiting audit using that paper trail. But, to the best of my knowledge, even those states *only audit a few contests* in each election." (Emphasis added.) A report by the **National Conference of State Legislators** confirms that just three states (Colorado, Rhode Island, and Virginia) require risk-limiting audits for one or more races.

8/ Correction post 1: @nybooks, not @NYRDaily
