@owillis

i had an idea once to just write out all the conspiracies. still might do it. its so insane.

> these are all things republicans really said
>
> democrats forced lenders to crash the housing market. george soros manipulated the markets too. this led to obama. obama used hypnosis to convince people to vote for him.

i have a lot of love for the obama mass hypnosis storyline.

im not making this shit up https://t.co/z9pBNWdGpn

An Examination of Obama's Use of Hidden Hypnosis Techniques in His Speeches

THE EVIDENCE IS HERE: This document contains over 60 pages of evidence and analysis proving Barack Obama's use of a little-known and highly deceptive and manipulative form of "hack" hypnosis on millions of unaware Americans, and reveals what only a few psychologists and hypnosis/NLP experts know.

Barack Obama's speeches contain the hypnosis techniques of Dr. Milton Erickson, M.D. who developed a form of "conversational" hypnosis that could be hidden in seemingly normal speech and used on patients without their knowledge for therapy purposes. Obama's speeches intentionally contain:

- Trance Inductions
- Hypnotic Anchoring
- Pacing and Leading
- Pacing, Distraction and Utilization
- Critical Factor Bypass
- Stacking Language Patterns
- Preprogrammed Response Adaptation
- Linking Statements/ Causality Bridges
- Secondary Hidden Meanings/Imbedded Suggestions
- Emotion Transfer
- Non-Dominant Hemisphere Programming

Obama's techniques are the height of deception and psychological manipulation, remaining hidden because one must understand the science behind the language patterns in order to spot them. This document examines Obama's speeches word by word, hand gesture by hand gesture, tone, pauses, body language, and proves his use of covert hypnosis intended only for licensed therapists on consenting patients. Obama's mesmerized, cult-like, grade-school-crush-like worship by millions is not because "Obama is the greatest

goddamn this is the good stuff

Obama is not just using subliminal messages, but textbook covert hypnosis and neuro-linguistic programming techniques on audiences that are intentionally designed to sideline rational judgment and implant subconscious commands to think he is wonderful and elect him President. Obama is eloquent. However, Obama's subconscious techniques are shown to elicit powerful emotion from his audience and then transfer those emotions onto *him*, to sideline rational judgment, and implant hypnotic commands that we are unaware of and can't even consciously question. The polls are misleading because some of Obama's commands are designed to be triggered only in the voting booth on November 4th. Obama is immune to logical arguments like Wright, Ayers, shifting every position, character, and inexperience, because hypnosis affects us on an unconscious and emotional level. To many people who see this unaccomplished man's unnatural and irrational rise to the highest office in the world as suspicious and frightening and to those who welcome it, this document uncovers, explains, and proves the deceptive tactics behind true "Obama Phenomenon" including why younger people are more easily affected.

ah yesssssssssssssssssssssss

PART 4 – ADDITIONAL SPECIFIC ASPECTS OF OBAMA'S HYPNOSIS

Obama's technique of head turned to the right side in interviews described by body language expert as one of the most powerful subconscious manipulation techniques possible by a speaker's body language

Notice how Obama has his head tilted to the right in interviews such as the Fox News interview with Chris Wallace April 27, 2008, his ABC News Nightline interview, as well as the August 16, 2008 meeting with Rev. Rick Warren,[153] and many others.

154

155

156

It is undeniable how Obama significantly tilts his head to the right in these and other interviews, but not when Obama is giving speeches.

According to Tonya Reiman, Author of "The Power of Body Language," such a head tilt to the right is "one of the most powerful manipulation tools of body language."[157] Tonya Reiman describes how there is no difference between what such gestures and manipulation. Barack Obama is actually manipulating you subconsciously by tilting his head without you even consciously realizing it. The reason is that tilting your head to the right specifically is a sign of vulnerability, a very effective one. Per our animal instincts, a head tilted to the right exposes an animal's jugular vein, their weakness, and in turn, causes us to lower our defenses subconsciously as a counter-measure, without even being consciously aware of it.

yes.

yes.

yes.

Obama's aggressive pointing- the subconscious signal of giving commands:

Here are some general examples of Obama aggressively pointing – the hypnotic symbol for giving a command.

147

At this point, Obama goes into a pattern, as he occasionally does, where his hand gestures just normally flow with the conversation without any specific meaning for the most part – essentially using his hands the way be believe he always is, in order to not be obvious.

Shortly thereafter, Obama anchors the word "believe" yet again with his usual thumb and forefinger

i love this stuff too much.

that moment. It is also effective because a primary message is Obama himself, and Obama has to a certain degree, anchored himself to the image of your hand as you hold a pen.

Obama is also caught loading this hand gesture with very specific concepts, such as JFK, and then pointing this same hand gesture inward towards himself a moment later, in ways that are clearly no accident, and ways in which he does at no other time other than with a concept he expects us to subconsciously associate with him.

97

storylines like this i also enjoyed were of course obama's plan to jade helm the guns and especially when "the generals" refused obama's orders to "nuke charleston." https://t.co/aQH3QT4pHv
