And ‘audit’ can only be as good as the Auditor + Access that they are given + standards they are auditing to.

I feel like (when it comes to Tech) we have people making rules & certifications that can neither hear, nor see... evil.

Remember this as we call for election “Audits”.

> Now, if what you are suggesting is they should do a full audit of election software + machine security, that could be worthwhile.
>
> But these software packages have *never* been reviewed/oversight!
