Werise

@We_Have_Risen

I like Stephen but I'll bite...

I saw a question asking what data and I answered him. I would gladly share the data & methodology. But I guess I am one of those lowly anons...

before accepting calculations from anonymous (or even non-anonymous) sources, insist on a citation to original data so that it can be checked. I'm told (but haven't seen reference by Werise) that this comes from NYT json data <https://t.co/6SD5ENF137>. I'll comment on this data. [pic.twitter.com/nqphPoqTa6](https://t.co/nqphPoqTa6)
