DAILY REMINDER: Joe Biden is NOT the President-Elect

Yesterday, was a big day. I was hoping to finally hear truth about how DVS were used to flip 6,000 votes in Antrim County from Trump to Biden. Instead, MI SoS and AG were authorized to intervene in the Antrim County case.

Why is the Antrim County Dominion data such a big deal?
- Evidence that Dominion systems were used to flip votes from Trump to Biden would be grounds to immediately decertify the 2020 Antrim County election results.

- Because Dominion systems were used in 47 out of 83 counties (including Wayne County), such evidence should immediately decertify the State of Michigan election results.

- Because Dominion systems were used in 28 out of 50 states including the most hotly contested battleground states in America, such evidence should provide basis of U.S. legislature to act under authority of the 12th Amendment to select next President and Vice President.

Lots more than this to unpack, however.
First the good news...
- If it weren't for the vigilance of Antrim County resident Bill Bailey, the 6,000 vote flip from Trump to Biden by Dominion Voting Systems would have gone unnoticed.

- About two weeks ago, attorney Matt DePerno was engaged at the recommendation of Trucker Randy to lead the local legal charge to get access to Dominion servers in Antrim County. His efforts have been exemplary in this regard.

- On 12/5, 13th Circuit Judge Elsenheimer did something that no one else in MI with the authority to do so had the courage to do up until that point in time. He authorized cyber security experts ASOG to copy DVS files for a detailed, independent forensics analysis.

Now, the bad news...
- Judge Elsenheimer included a protective (i.e. gag) order in his December 5th ruling against the disclosure of details about the Dominion system in his authorization for analysis thereby preventing disclosure of evidence related to vote flipping.

The rationale for this protective order is to prevent disclosure of proprietary Dominion data. Since Dominion is under contract to the state of Michigan, the "features" of the Dominion system should already be subject to public disclosure, however.

- Rather than release the protective order during yesterday's hearing, Judge Elsenheimer authorized SoS Benson and AG Nessel to intervene in the case.
- Time is short. On December 14th, MI electors will convene in Lansing to cast their electoral college votes.

"Smoking gun" evidence from Antrim County would help to ensure that these votes would not go to the Biden/Harris ticket as a reward for their election theft.
Next steps:
- Results of Antrim County Dominion system analysis must be made public immediately.

This can be accomplished the following ways:
1) MI Legislature subpoenas ASOG affidavits and makes affidavits public immediately
2) Federal government (DoJ, FBI or DNI) intervenes to make the affidavits public
3) Judge Elsenheimer rescinds his protective order

- MI Trump electors must meet and assign their votes for President and Vice President to the Electoral College
No pressure, but the future of the free world hangs in the balance. We cannot afford to let Biden/Harris and their attempted coup accomplices be successful.

Who will rise up to lead at this critical time in our nation's history?
