Attention MAGA faithful ... your king, @realDonaldTrump, has only been tolerated by Republicans because he has what Grover Norquist in 2012 called "enough working digits" to sign tax cuts for the super-rich, deregulation for polluters, and to nominate Federalist Society judges.

He was really useful to Paul Ryan who couldn't get elected Vice President alongside Mitt Romney because it was too obvious that they would govern for the super rich. Better to pull it off with a fake "populist" howling at the moon to entertain the base... https://t.co/Sw6AuUCJ2u

Really, really useful ... because he clearly shares those race-based anxieties and rages... https://t.co/mlsG1zjGSc

Thanks to Trump, D.C. Swamp Republicans have milked y'all's immigration panic, Fear of a Black Planet, freakout over liberated women, wig-outs over gay marriage and trans people in the bathroom etc. to deliver everything the real billionaires wanted. https://t.co/z2WU4B5dnH

So it should come as no surprise to you all that the Supreme Court justices Mitch snatched up like a constant Grinchly Christmas? They don't work for Trump. They work for their real bosses... the Federalist Society and you guessed it ... the super rich. https://t.co/hFMkhERxDi

Once Trump handed Gorsuch that stolen seat, and signed off on Schlitz Malt Whimper and the handmaid getting lifetime seats? They could give a damn about him and his frantic quest to stay president. So really? They were never gonna help him. Like ... ever. https://t.co/Zt4nnGUEim

Trump is likely to continue putting on his "overthrow the government" show for you guys ... but you should know that that's just because he's terrified of being prosecuted and also to get you to give him money. Don't say you weren't warned! https://t.co/XmMFWQHCRS

> NEW VIDEO: Don't fall for Trump's "legal fund" scam. The election is over. Biden won.

And all that your 126 Republican legislators at the federal level and your anti-voting state AGs will have accomplished will have been to subvert our democracy, destroy their own legacies and likely foment violence, and you'll take some of the blame for that. It's a catastrophe.

And all for literally nothing. Nothing but mass viral death in numbers equivalent to World War II, Cancer and Heart Disease, economic misery on a Great Depression-like scale, global humiliation and the collapse of a once great political party into a white nationalist mess.
