### ■■Clinton Foundation --> Solar winds connection

### ■Thread ■■■

**Clinton money runs very deep. They've been involved with elections since 2014....  
How was the foundation allowed to fund "projects" dealing with elections even  
while Killary was running as president?**

~1~The Clinton foundation is the source of many well funded activities that allows them to control everything. Barrick Gold Corp is relevant to #Solarwinds & the Delian Project to Dominion. I'll cover Barrick once I get to Newmont through UBS. We will focus on the Delian Project.

~2~"In 2014, Dominion Voting committed to providing emerging and post-conflict democracies with access to voting technology through its philanthropic support to the DELIAN Project, as many emerging democracies suffer from post-electoral violence due to the delay in the...

...publishing of election results. Over the next three years, Dominion Voting will support election technology pilots with donated Automated Voting Machines (AVM), providing an improved electoral process, and therefore safer elections."

here on buying into sustainability.

### **Will Biden normalize international relations with China, and what are the investment implications?**

In our base case, a US strategy of China containment, which has broad bipartisan support, is set to continue. The long list of measures taken by the US is therefore unlikely to reverse course any time soon. However, President-elect Biden's China policy is likely to be more predictable and pragmatic. Consequently, US-listed China shares could benefit from fewer delisting threats. A Biden win should also be seen as a positive for the Chinese yuan, as the president-elect is less likely to use tariffs as a policy tool. For its part, China's focus is likely to be on investing in self-sufficiency and fast-tracking the building of alternative financial and technological infrastructure. We expect a continued shift to a more bipolar world of divided technology ecosystems, led by the US and China, increasing the importance for investors [to diversify globally in the technology sector](#).

Priscilla Chan and Mark Zuckerberg are putting up \$300 million to promote "safe and reliable voting in states and localities" amid the pandemic, the Center for Tech and Civic Life and Center for Election Innovation & Research will announce Tuesday.

MI SOS @JocelynBenson loved the idea...

- In the joint release, Michigan Secretary of State Jocelyn Benson (D) said: "This grant will be of tremendous assistance as we work to get the word out to voters."
- Ohio Secretary of State Frank LaRose (R) said Americans need voting information "from trusted sources, and these dollars are going to go a long way to making that happen."

committed \$250 million to CTCL, which will use the money to help local jurisdictions with staffing, training and equipment.

- Chan and Zuckerberg committed \$50 million to CEIR, which focuses on voter education, to assist state and local election officials in making sure elections are secure, and voters have confidence in the outcomes.

*"Of the 14 nuclear weapons contractors tracked in this report, Lockheed Martin has been the biggest contributor to key members of Congress with influence over nuclear weapons spending."*

William D. Hartung & Christine Anderson, Center for International Policy Report: "Bombs Versus Budgets: Inside the Nuclear Weapons Lobby"

SIPRI placed Lockheed Martin at the top of their "Top 100 arms-producing and military services companies in the world excluding China, 2011" list.<sup>1</sup> The company has yet to sign the UN Global Compact.

According to Andrew Feinstein's book, *Deadly Business*, the defense industry is responsible for more than 40 percent of global corruption – more than any other industry in the world. Feinstein claims that companies like Lockheed Martin, Boeing, and BAE Systems have reputations for bribing politicians across the world. This has prompted some, like the Indian MoD, to blacklist Lockheed Martin over suspicions of corruption.<sup>2, 3</sup>

Lockheed Martin weapon systems can be found aboard all U.S. Navy nuclear submarines and aircraft carriers deployed worldwide.<sup>4</sup> The company produces a wide variety of nuclear weapons such as the Trident II D5 nuclear missiles found on American *Ohio*- and British *Vanguard*-class submarines.<sup>5</sup> Lockheed Martin also contracts the new guided B61-12 TSA tail kit, which increases the accuracy of deployed, ground-penetrating bombs, or "mini-nuclear-bombs."<sup>6</sup>
