1. Tues. 29 Dec. Sidney Powell Lays Out Election Fight: https://t.co/7JcNdhdKTD

During a radio interview with Todd Herman, pro-Trump attorney Sidney Powell gave an update on her ongoing 2020 Election fight:

2. “The very night of the election many people saw something that they had never seen before in the history of our elections: votes being changed on the screen in front of them, going from President Donald Trump to Joe [B]iden.

3. “The morning after the election, even that night, the voting stopped. They stopped counting in multiple districts at the same time before the vote got to 270 electors for President Trump. That’s never happened before. The only time votes have ever stopped being counted in...

4. ... this country on election night was when the Broward County problem developed over Hanging Chad’s in one county in FL. So for FIVE states to stop counting on election night is absolutely unprecedented. They did it because the vote count for the Electoral College was...

5. ... about to hit [+ go over] 270 for President Donald Trump because of the massive outpouring of votes for him that night.

“By the next morning, multiple mathematicians had contacted me to say that they knew the algorithm that had been run to change the votes. It was...

6. ... that obvious to people with mathematical expertise. It is a mathematical impossibility for 100’s of thousands of votes to show up for VP [B]iden alone and to have been injected into the system the way that they were.

7. “We have eye-witness testimony of countless people who saw votes coming in, in unsecured containers and improper means and looking different the night of the election. These people have come forward at great personal risk to themselves & their families to provide thousands...

8. ... of affidavits of voting abnormalities and actual crimes that they witnessed happen on election night.

“Then there is the very fact that the other side was working so hard to hide all of this. Federal law required transparency in

our electoral process and our elections.

9. There is a federal statute that requires all the documents pertaining to the election to be maintained for 22 months following an election, for the very reason that it has to be completely auditable.

10. “A Federal Judge in October [in ATL] found all kinds of problems w/ the Dominion system that GA bought and crammed down for everybody across the state to use. That’s where the most problems have been – in Georgia.

11. “Witnesses have come forward. There was supposedly a water leak that they shut down voting for. That was an abject lie. We have video of witnesses pulling suspect ballots out from under a table after they ran off all the observers. Somebody told me that one of the people...

12. ... that did that has told gov’t officials how it happened and what happened.

“Has that information been provided to the public? No.

“There is rampant voter fraud of all kinds: Federal violations of 5 years + more across the country by virtue of all the misconduct...

13. ... on election night.

“The flipping of votes by Dominion is even advertised, on their ability to do that, to run a fraction, to make a [B]iden vote count 1.26% and a Trump vote to only count 0.74%.

“They’ve done it before. They’ve done it in Venezuela....

14. ... They did it in other foreign countries.

“They’ve done it in THIS country. We have evidence even that it was done in 2016 in CA to benefit Hillary or Bernie Sanders, and it’s been done in other local elections and smaller elections in different places.

15. “This is the only time it’s been this widespread. They’ve been able to shave these votes for a long time, but the reason it didn’t work completely this time and they had to shut down in so many places, was because so many Trump supporters poured out on the day of the...

16. ... election to vote for President Donald Trump in what was a LANDSLIDE victory, a historic victory. It broke the algorithm. That’s why they had to stop counting that night. That’s why they had to bring in ballots and try to back-fill.

17. “And it still doesn’t work, because there are still 100’s of thousands of more votes than there were voters to vote them. The math simply doesn’t add up.

“If they had anything to hide, why aren’t they...

18. ... providing transparency into the voting systems of the United States of America, the country that is founded upon the Rule of Law and is supposed to be above all this? It is absolutely the most appalling criminal operation in the history of our country.”
