Trump was way ahead of the Democrats on the election fraud. Shortly after his 2016 election, President Trump received intelligence that Barack Obama plotted with the U.S. Embassy in Rome, Italy, and Italian Prime Minister Renzi to overthrow the 2020 Trump Reelection

.

President Trump and cyber-security teams learned that, just before he left office in January 2017, Obama stole $400 million of U.S. taxpayer's money (14 pallets of cash) originally intended as payment for Iran, and redirected it to Prime Minister Renzi and the Rome Embassy.

U.S. Cyber-security teams ***tracked the exact routes of that cash*** The cash was distributed to several accounts and used to fund the electronic vote switching using Italian military satellites operated by Leonardo, an Italian aerospace, defense and security company.

William J. Lynn III is the CEO of Leonardo DRS, a U.S. subsidiary of Leonardo. He previously served under the Obama/Biden administration as Deputy Secretary of Defense & led the Department's efforts in cybersecurity & space strategy.

The election day operation was orchestrated by Stephan Serafini, a 20-year foreign service officer, and General Claudio Graziano, a board member of Leonardo.

When vote counting stopped on election night, the data was transferred via the secure Italian military satellites then sent to Frankfurt, Germany where votes were electronically switched from President Trump to Joe Biden.

At Mar-a-Lago, on Christmas Eve, President Trump was informed that he would be receiving affidavits and confessions from several people involved in the operation.

The above is the press notification that just took place THIS EVENING. The primary speaker is Maria Strollo Zach, CEO of Quantum Solutions
