Negative votes & vote switches should *NEVER* happen on your CNN, ABC, & NBC live news feeds. This is according to the data scientist & programmers who presented at the State Senate hearings. They previously worked for the US Navy, the CIA, & Big 4 Accounting Firms.■

Elections are an additive process — you count the votes — and add them up. Votes should never be going down on live television. Votes should never be switching between candidates on live television. This is election fraud & it happened all across the nation.■

It happened last night.
