Beyond disappointment in @johnfocook and his @skepticscience. It has become another scientology church.

Maybe @ggreenwald will want to make a paper on this:

> **How the imperialist mindset/narrative is infesting the scientific fields.**

//next

What @skepticscience posted on their FB page
> https://t.co/NXMG74TVhm

My instantaneously censored comment + blocking me for being able to comment on their page.

"You mean the team of Biden ?
The oligarch team who's as dirty as Trump's team ?
The same Biden who has relentlessly hunted Snowden under Obama and forced both Snowden and Greenwald into exile?
Sure!

I used to appreciate reading "Bulletin of the Atomic Scientists" and "Skeptical Science". Now you both are deep in political platitudes.
Your rationals are completely outdated.
//next

You should educate yourself and guess better on the future of climate under neoliberalism (be it nationalist or globalist) IF the issue really concerns you.

For people who still want to educate themselves instead of wasting their time reading rants, just follow @JMJancovici and @DrJamesEHansen. Those are quite apolitical (read "scientific mindset") and still at the top.

A final advice to @johnfocook @skepticscience :

If you do not want people to comment at a political level, then do not post at political level.

Start pouring water into your wine or you will continue to drive people away from your echo chamber.
