Thanks. Praj Industries perfect smart distribution. More weakness below 336. Rise to 355-365 can face selling pressure.

Below 336 I see 275 in few months as long as its trading below 388 on closing basis CMP 351. https://t.co/iMRpbTfOpU

Your analysis and sl saved my time and some bucks otherwise I would've lost much bigger amount,

Can you share your views on praj industry @shivaji_1983
