Top 20 Most Powerful Quotes From Scientists of All Time

\\ Thread //

1.

“Two things are infinite: the universe and human stupidity; and I'm not sure about the universe.”

■ Albert Einstein

2.

"The saddest aspect of life right now is that science gathers knowledge faster than society gathers wisdom. "

■ Isaac Asimov

3.

"If I have seen further it is by standing on the shoulders of Giants."

— Isaac Newton

4.

"The good thing about science is that it's true whether or not you believe in it. "

■ Neil deGrasse Tyson

5.

"A man who dares to waste one hour of time has not discovered the value of life."

■ Charles Darwin

6.

"Science without religion is lame, religion without science is blind. "

■ Albert Einstein

7.

"Nothing in life is to be feared, it is only to be understood. Now is the time to understand more, so that we may fear less."

■ Marie Curie

8.

"You cannot teach a man anything; you can only help him discover it in himself."

■ Galileo

9.

"Imagination is more important than knowledge."

■ Albert Einstein

10.

"It is strange that only extraordinary men make the discoveries, which later appear so easy and simple."

■ Georg C. Lichtenberg

11.

"Equipped with his five senses, man explores the universe around him and calls the adventure Science."

■ Edwin Powell Hubble

12.

"I seem to have been only like a boy playing on the seashore, and diverting myself in now and then finding a smoother pebble or a prettier shell than ordinary, whilst the great ocean of truth lay all undiscovered before me."

■ Isaac Newton

13.

"Everything is theoretically impossible, until it is done."

■ Robert A. Heinlein

14.

"We live in a society exquisitely dependent on science and technology, in which hardly anyone knows anything about science and technology."

■ Carl Sagan

15.

"Research is what I'm doing when I don't know what I'm doing."

■ Wernher von Braun

16.

"Science is not only a disciple of reason but, also, one of romance and passion."

■ Stephen Hawking

17.

"Your theory is crazy, but it's not crazy enough to be true."

■ Niels Bohr

18.

"An experiment is a question which science poses to Nature, and a measurement is the recording of Nature’s answer."

■ Max Planck

19.

"Truth is ever to be found in simplicity, and not in the multiplicity and confusion of things."

■ Isaac Newton

20.

"One, remember to look up at the stars and not down at your feet. Two, never give up work. Work gives you meaning and purpose and life is empty without it. Three, if you are lucky enough to find love, remember it is there and don't throw it away."

■ Stephen Hawking

Do you want to think better?

Do you want to think like:

-Galileo
-Isaac Newton
-Albert Einstein
-Richard Feynman
-Stephen Hawking

"100 Mental Models" will help you understand how the greatest minds think about the world.
