The entry points are marked with a orange arrow, 10,20 and 50 Daily Moving average are used and the commentary by @Qullamaggie sir is written on the chart itself.

The setups are breakout setups, where the stock makes a big move,
surfs (takes support) either on the 10,20 or the 50 MA,
Makes Higher Low's,
Forms a Tight Range with Narrow candles,
then
BREAKOUT's!!
