When I have checked on Open corporate, there is fetched data available of that company but
When you click on anything it takes you to the UK government official website where data has
Been removed

Now biggest question is that how he is able remove old data from UK government official data? Who is helping him? This is almost impossible to remove data from UK government website. It means he has support from someone in UK government!

I request @HMOIndia to look into this very seriously. This is not normal.

For twitter: all these data are available on open source websites ■

Please RT maximum and tag big RW accounts so it can be reach to maximum people ■
