Today, I'll quickly touch few things that I think a lot of couples/partners are really lacking in relationships and marriages as regards sex and Romance...
THREAD■■

1) Hygiene...As negligible as it is when talking about romance, poor hygiene is a total turn off in any Union be it marriage or relationship...
Men and women should always be mindful of this.If your partner doesn't like you keeping a bushy pubic hair, it's best you get them

trimmed regularly.

Change your underwear regularly and wash immediately...Let your partner choose for you when shopping for them..send images to WhatsApp, let them choose...It's helps a lot.
Go for deodorant shopping together if possible, so as to choose the ones with wonderful fragrances,

wear them, use body spray, roll on and colognes, smell good and be very neat..
