GIFT :-

WE HAVE READ LOT OF BOOKS , SEEN LOT OF VIDEOS ETC , TO INVEST IN A STOCK COMING OUT OF STAGE 1 AND ENTERING TO STAGE 2

BUT ITS DIFFICULT TO FIND STOCKS , I HAVE GOT A GIFT FOR YOU GUYS

A SCANNER IN THIS POST , JSUT RUN ONCE AND FOLLOW THE SYSTEM

The stock was in the **accumulation phase** from March 2007 to September 2012. During this phase, big players slowly kept accumulating the stock without getting noticed.

From October 2012 onwards, the price started rising and this **advancing phase** lasted till September 2016.

Big players started exiting their positions during the **distribution phase** which lasted somewhere between September 2016 to September 2018.

Once the big players were out, due to lack of demand price started correcting and soon after a breakdown, panic selling started and the stock price kept falling. This **declining phase** lasted from September 2018 to April 2020.

I hope that by now you would have clearly understood how price moves in a cycle.

Now based on your trading style and time horizon, this

https://t.co/JLFVqgESfQ

ENJOY THE SCAN GUYS , HOPE YOU ALL WILL MAKE MAJOR USE OF IT .

RE-TWEET AND SPREAD AS MUCH AS YOU CAN , NAD HELP FRIENDS AROUND .
