# Twitter Thread by PROTEENINJECTOR

**PROTEENINJECTOR**
@proteeninjector

**Who wants a video on how I day traded $apps using @ripster47 clouds? @TalatiTapan ■**

**I was not super profitable, but this was the first time I tried out the clouds during a day trade. Something clicked and I wanted to share. Please correct me if I'm wrong, only way I'll learn!**

$apps #dayTrade - it's been on my watchlist and I've been in and out of it. Today I decided to use his clouds. I've made them my own. Green is buying, yellow is selling, Go Pack Go! I'm using it on the 1 min chart. I noticed a pattern and I'll dive into that on next video.

Ok PROTEEN, cool…but how do you know when to buy? A lot of that comes from experience or “instincts” you build over time. My instincts said higher lows, coupled with candles above cloud, should mean an uptrend is coming. How much uptrend? Who knows? Manage your #risk

Outcome - positive #gains, but stopped lossed out, thus closing this trade out green.
It’s not about the amount of money I made, it’s the knowledge I learned in one trade. The clouds help new and seasoned traders visually see trends and manage risk accordingly. #LuvUall10!

Again, experiment with them in different intervals. Change the ema timeframes. Whatever fits your trade style. You want to work with your style, not against it. You won’t know till you try it out. Thanks @ripster47! #GitDemGains
