Twitter Thread by Adam

Adam
@abetrade

There has been a lot of said about risk management on the internet, courses, etc. What I found out going through this topic is that it's often very incomplete or narrow. That's why I have decided to put together this comprehensive

also in my blog posts I always used just my own stuff but for this one there is lot I learned from @Trader_Dante and @edgewonk and other resources mentioned in post so make sure to check them out
