## Looks excellent. Reversal from primary trendline as well

<u>#FnOstock</u> <u>#SBIN</u> has completed a 9 month time correction towards the primary trend line & is all set to head higher from here.

This could also be a <u>#SIP</u> stock considering it broke out from a decade long consolidation in Feb'21.

Might continue to outperform #Nifty & #Banknifty pic.twitter.com/mYk4exvOn7
