I joined @Justsiva123 after watching him on E-Learn Markets.

I stopped trading after losing my money and moved to investing but I am still part of the mentoring group where I see one of his so claimed Star Trader Swaminathan posting 5L - 10L Screenshots every day.

I always doubted him because he said that he never lost intraday after march 2020. Also claimed that he manages 5 Cr Fund and Makes 1% every day on it.

Yes, so every day some ~5L rs and Siva also supports his claims and has made him a mentor.

Siva also keeps on praising him for his fast skills and whenever a traders lose money he will say

" Look at Swami, how he does it so fast you guys need to work on your execution in scalping. "

Today also Swami posted a 5.92L Profit, and praised Scalping and Siva.

When look Closer, the Total Buy Price is greater than Total Sell Price. So looks like he made a loss on 4.7L but used the Yellow Marker to HIDE the " - " sign and posted it as a profit.

When he was questioned by a trader he said, it is a problem with NEST.

All other strikes are fine but for this one strike only NEST has issues.

Today my patience gave up because he has been doing it from more than 9 months and lying everyday.

Recently in a live session he was not able to take a single trade.

Kindly RT to stop this scam.
