China’s Super Soldiers with Bio-enhancement Capabilities

On December 3rd, 2020, John Ratcliffe, the Director of National Intelligence, posted an article1 in the Wall Street Journal warning the American people that ,

“the People’s Republic of China poses the greatest threat to America today and the greatest threat to democracy and freedom worldwide since World War II.”

The message is loud and clear, and most Americans agree with Director Ratcliffe’s description of the danger that the CCP regime poses to the American people but would not know how to react to this statement:

“U.S. intelligence shows that China has even conducted human testing on members of the People’s Liberation Army in hope of developing soldiers with biologically enhanced capabilities.” Things like that are only found in sci-fi movies.

Three days later on December 6th, Lude, through his Lude Media podcast, confirmed the above information by adding a new element: the CCP is inserting genetic mutation into the bodies of the PLA soldiers in order to develop “super soldiers”2.

It is no secret that the Chinese Biolabs has been using CRISPR to do gene editing. What they hope to achieve is that genetically enhanced soldiers will be able to fight stronger and longer in a battle, while possibly spreading CCP lab-made virus, such as the COVID-19.

The sad part about these soldiers is that most of these young people come from farmers’ families in the countryside, and they would not be able to resist what the military doctors and high-ranking officers do to their bodies.

Upon learning that perhaps the CCP backed presidential candidate Joe Biden might have lost the election, Chairman Xi Jinping started to call war between China and the US the “Ultimate War”. There is nothing that the Chinese communist regime would not do to take over the US.

The Communists have never played by the rule since it settled on the Chinese soil 70 years ago.

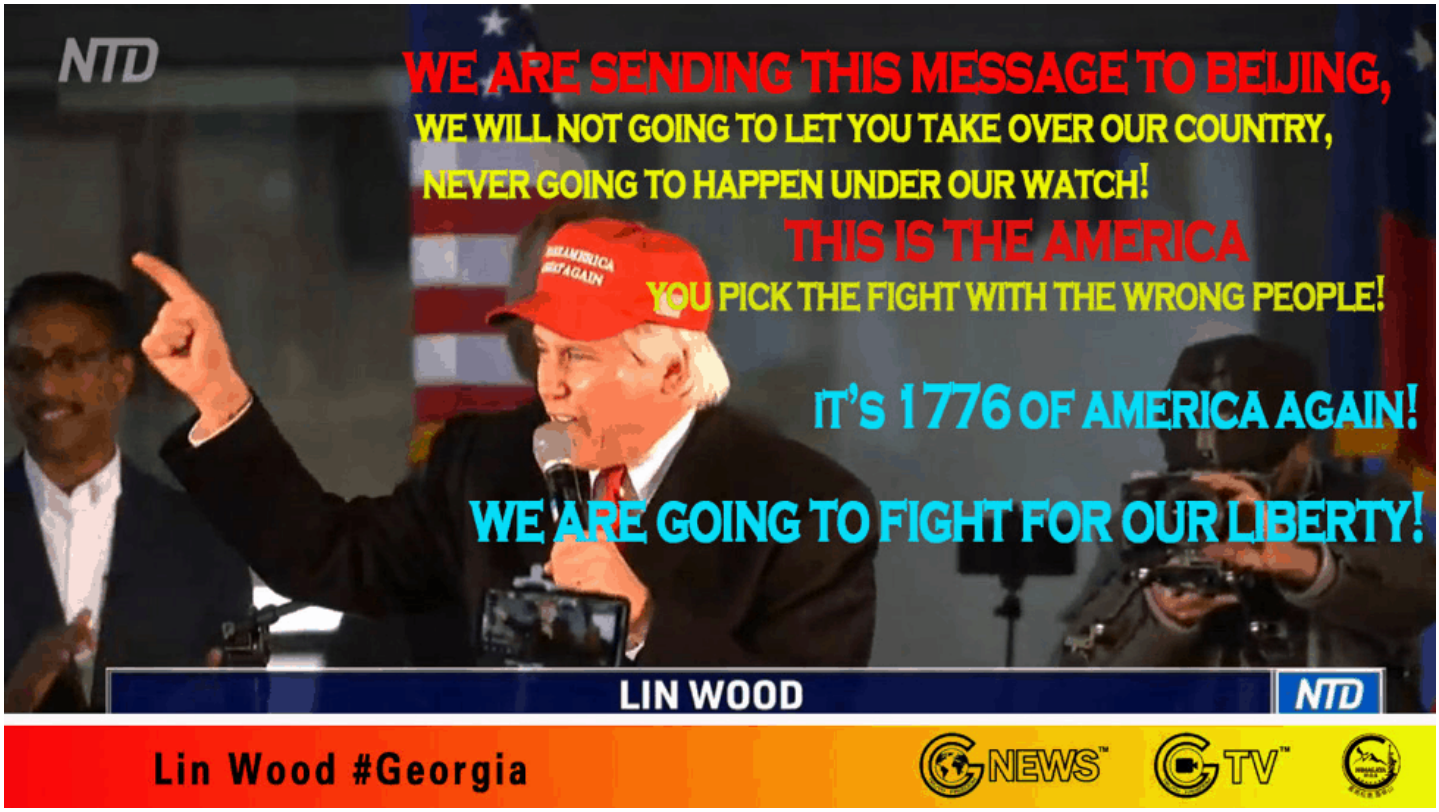

While many Americans are trying to connect the dots between the coronavirus and the Dominion voting machines to find out why, after 3 years of great economy,

they are feeling worse than ever. President Trump has finally reached a sobering conclusion that either the CCP will destroy the United States of America or that he has to take the lead to drive CCP back to Hell! His decisiveness is shown from financial, legal and military fronts

The Trump administration has just designated “14 Vice-Chairpersons of the NPCSC in connection with developing, adopting, or implementing the Law of the People’s Republic of China on Safeguarding National Security in the Hong Kong Special Administrative Region”3

The overseas assets of these high-ranking officials, within the trillion-dollar range, are blocked by the US government. Banks will be no longer to able to deal with them. There will be no visa for them and their immediate family members.

And this is just the beginning of financial sanctions against the CCP families

On the legal front, the greatest lawyers are standing with President Trump: Attorney Rudy Giuliani, Attorney Lin Wood, and Attorney Sydney Powell, even though the latter is not defined as part of Trump's legal team. Such a powerful team reminds the American people of the

"Dream Team" for O.J. Simpson's defense. His criminal trial is known as the "Trial of the Century" for that reason.

The difference is that the three lawyers who advocate for American values know how to effectively use social media, such as Twitter and YouTube. Mayor Giuliani is undoubtedly a big showman.

His YouTube video is dramatic when the fake news media tried to trick him with questions about the Trump team's contested election claim in several swing states.

Just by looking at the daily tweets by the three attorneys, the American public will gain enough information on where we are on the legal route for victory.

On the military front, retired General Michael Flynn bought full-page advertisement space on December 2nd to convey his message:

"We the people"4. He states that President Trump should declare partial Martial Law in this country on the issue of habeas corpus as there is plenty of evidence that the foundation of the United States is under attack.

We the people are starting to listen to the real news and follow our hearts to defend this country to prevent the China regime from launching full-scale biowarfare against the US!
