#FreeTip

Free but powerful Tip

A simple strategy for those who aren't comfortable with complex 1s like adv pivots, mp, cub, etc.

MIB/WIB/ DIB

1) MIB - Scan for stocks with Monthly inside bar. Eg,Today 02/8; So scan for stocks with July monthly candle inside June monthly candle..

....

2) WIB - Now look for Weekly inside bar amongst stocks filtered in S. no .1 ; For Eg, Today 02/8, Look for stocks within S. no. 1 with weekly bar of 26/7-30/7 inside the weekly bar of 19/7 - 23/7.

3) DIB - Now after doing the above look for stocks with daily inside bar ...

....

from amongst the list filtered in 2.

For Eg. Today is 02/08, Candle of 30/7 inside candle of of 29/7. Long above PDH with stop of PDL.

In this Eg, long above 29/7 high with stop of 29/7 low. Other methods to go long are break of Cam R4 for long; Reverse for short.
