One secret to catching big winners:

1. In a bull market like this, stock should have atleast done more than 50% in last 6 months.

2. Stock should trading within 25% of 52 week highs

3. Should be breaking out of base or recent highs after correction

@chartmojo @caniravkaria

Offcourse, this rule does not to recently listed stock as there is no history. They could still do well otherwise.
