**For finding potential breakout candidates, you may run this scanner daily EOD, whenever any new candidate props up, check its chart for signs of breakout.**

**You may modify & fine tune this as per your own criteria like adding RSI or ADX or other indicators. https://t.co/FdiPG1c4s0**

Bhai, can you please educate us, how do you find the breakout stocks? I mean which scanner? Any inputs would be much helpful.
