Jubilant Ingrevia - Key learning?

It is important to analyse the strength of the breakout. If the price does not continues the move in 1 or 2 sessions and candles show long upper wicks, it is better to bring the SL closer. Distribution sign.

Will be helpful in next breakouts. <https://t.co/AtZOj4bKeT>

Learning: Strong breakout

1. Breakout candle will have no upper shadow or extremely less compared to the body
2. Volumes will be high (to avoid retailers to enter & also big hand absorbing all the selling)
3. Pullbacks will be rare/very less
4. Happens after a long consolidation pic.twitter.com/YTHDOnEdxo
