You could follow "#Movingaverages Trading system with 2 MA (13 & 21Sma)" in simple way or add 1 or 2 additional strategies
Simple: When 13 moves above 21 in "15 Minute t/f for Intraday only", BUY
When 13 moves below 21 in "15 Minute t/f for Intraday only", SELL as in a SAR system

> Master just one doubt about the re-entry part
> You mentioned to re-enter at 17430 levels.
>
> How to initiate the trade at the lowest point when the candle is in the formation mode.
>
> Is it that when the price touches 21ma we should entry longs till 13ma is above 21ma.

Addl.strategy: When prices move far from MA, say 150 to 200 pts, "Part book" & re-enter when prices pull back to MA
Choose to do this way 1 or 2 times only for intraday
Idea is "Mean Reversion" - Prices tend to move back to MA IF they move far away from MA in a trending phase.■

Price makes very strong move away from the mean
Price still reverts to the 'mean'
