3 Ways to Ride the Complete Trend in a Stock

1. Supertrend
2. Moving Averages
3. Relative Strength

A Thread ■ With Examples

Retweet Comment and Share :)

SuperTrend :

It is TrendFollowing Indicator That generates Buy / Sell signals based on the ATR value or volatility of the stock

Supertrend also works as a trailing stop-loss for the existing trades Best on daily time frame

Supertrend Conditions

One can try and backtest on 10,2 at own also !

$$3/n$$

1. Works Best In trending Markets
2. Keep Riding the trend till Supertrend Turns Red
3. Use Price Action to Enter and Supertrend As Trailing Stoploss
4. Sometimes Gives Multiple Signals Where you can take Small Stoploss .

Example :

4/n

jayneshkasiwal1 published on TradingView.com, Feb 16, 2022 15:36 UTC+5:30

Supertrend to be avoided in Sideways markets as it gives a lot of false Signals .

Use Normal Support Resistance as Stoploss in this case

5/n

jayneshkasiwal1 published on TradingView.com, Jan 14, 2022 16:45 UTC+5:30

3. Moving average stoploss

The "well known" moving averages, such as the 50, 100, 200 daily moving averages act as natural support and resistance.

21 ema Momentum Trades

50 ema short term trades

200 ema positional trades

200 Weekly ema Long term trades

6/n

Shouldn't be used in sideways stocks , either it should be clear uptrend or clear downtrend

Stock Will Give multiple Signals which has to be ignored

Red 21 ema

Green 50 ema

What is Relative Strength ?

■Relative strength is a strategy used in momentum investing and in identifying value stocks.

■It focuses on investing in stocks or other investments that have performed well relative to the market as a whole or to a relevant benchmark
