About Darvas :

In the late 1950s, Nicolas Darvas was one half of the highest paid dance team in show business.

Darvas turned a \$36,000 investment into more than \$2.25 million in a three-year period.

1/n

It was on a two-year tour of the world that he initially developed his 'Darvas Box' method of screening stocks – a method of picking stocks based on the stock's price and volume .

Trading Style :

TREND FOLLOWING MOMENTUM TRADING

■Darvas was tracking stocks only making new high

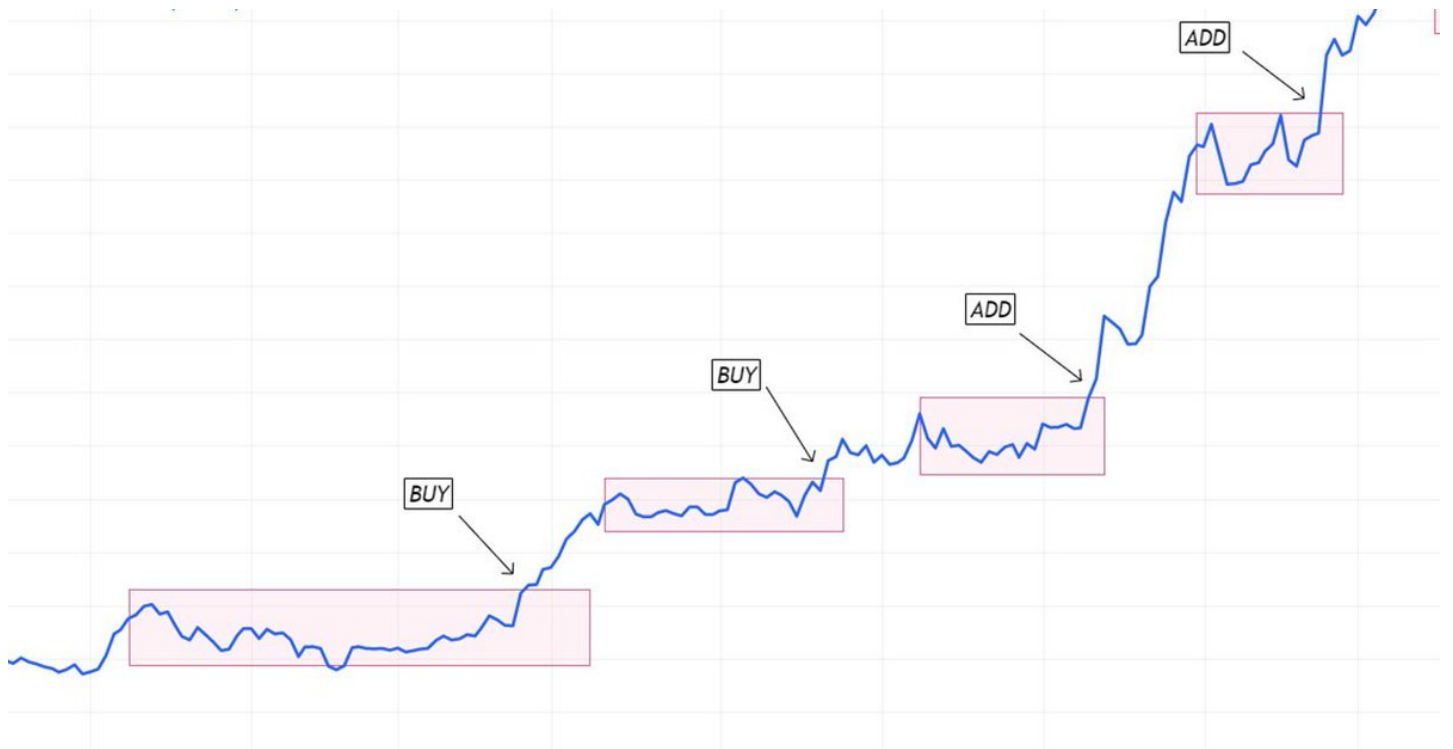

Trading stocks breaking 2-3 year high.

■But 52-week high is mostly tracked for this theory

■Emphasized very much on Huge volume Breakouts

A typical Darvas Box Chart :

3/n

Rules to Follow :

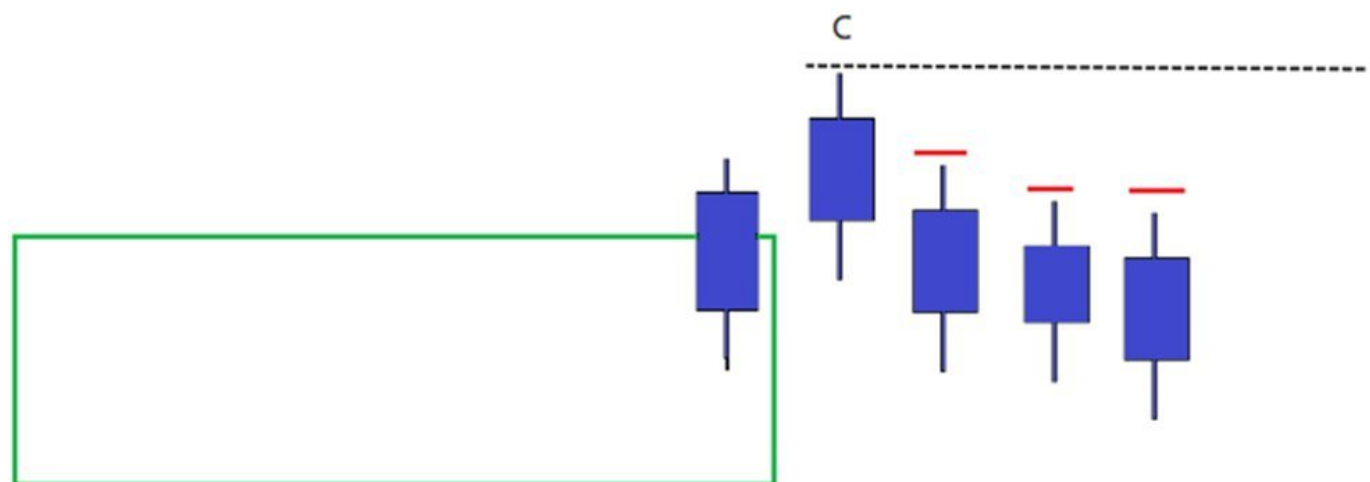

- Stock Price Should be within 15 to 20 % of Highs
- Overall trend of the stocks should be up and greater than 200 ema
- Preferably 100% up then the 52 week low
- Look for Industry Leaders , with High Growth

4/n

How to Trade ?

- Whenever the stocks breaks the 52 week Keep them on watchlist
- Look that The next 3 candles should not break the 52 week high and fall below
- The high point will be called as CEILING
- Look for Volume Breakout too or Breakout should be Above Average volume

5/n

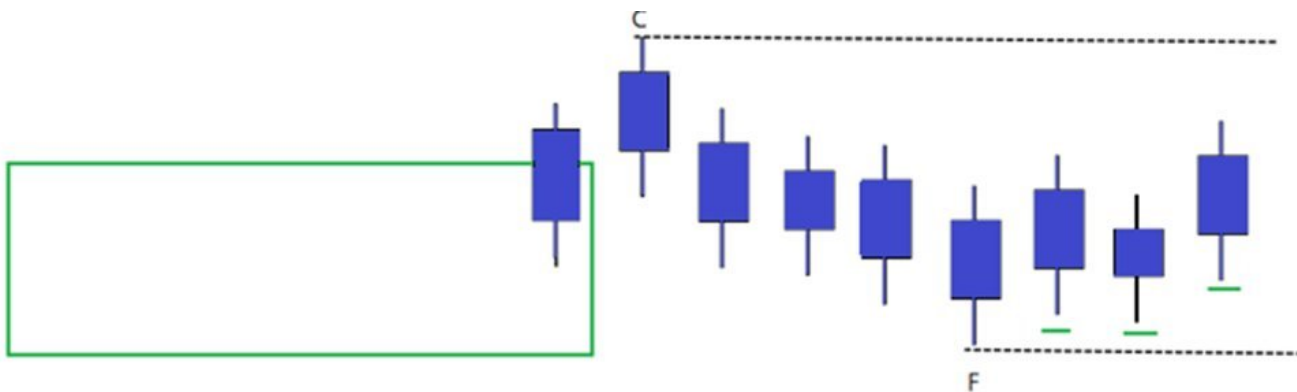

Floor: Stoploss

■Floor is basically the a small reversal point or bottom the stock is trying to make.

■Floor is generally the stoploss of the trade

■The bigger the range the bigger the stoploss and higher the Risk

6/n

Example : #GREENPANEL

After 52 week High , mark the Top: Ceiling

After a small Reversal mark the Bottom : Floor

Enter As soon as the 52 week high breaks with stoploss

7/n

#RADICO #MANINFRA

■Enter When 52 Week High is Broken , and Keep Adding as and when the box formation takes place .

■Keep Shifting the stoploss to next Box lows

8/n

TradingView

PIC 1:

Entry on failed Breakout but Stops Dont hit as Stoploss is below the Box

PIC 2 : You should only draw boxes when the next 3 candles of 52 week high dont break the high.

9/n

TradingView

Parameters checked : #MINDAIND

#kotakbank : Not valid Box , as stock is not breaking the 52 week high only the range breakout is happening

Also Restrict yourself to growth stocks that is midcaps and smallcaps

10/n

Time and % Difference of boxes :

There isnt any fixed % of difference from ceiling to floor mentioned any where

There also isnt any time frame mentioned how much the sideways trend or box formation will take place

There could be any combinations of boxes and there sizes

11/n

Small Range Big Consolidation

Big Range
Small Consolidation

Big Range , Big Consolidation

Short Ranges : IRCTC

Long Consolidation : BIRLASOFT

Short Range , Short Time : JINDWORLD

Trailing Stop and Pyramiding

1. Buy if price closes above Ceiling and put a stop-loss below Floor price.
 2. Add Small Qtys as breakout happens and one can pyramid in winners and further breakouts
 3. Ride the winner till you get Stopped
 4. Reenter if stock regains 52 wk high
- 13/

jayneshkasiwal1 published on TradingView.com, Dec 29, 2021 20:21 UTC+5:30

3. After the breakout of the box, if price moves higher and forms another box, then trail stop-loss to the Floor price of the newly formed box and keep trailing on each subsequent floor.
4. Exit the trade when price goes below the floor price of the recent box.

STOCK FUNDAMENTALS

Buy companies whose growth & earnings prospects look highly promising

Overall Market trend should be bullish

Stocks should be outperforming the general Market and should be leader

Breakout should be always on higher volume

Prefer Midcaps and Smallcaps
