@ProdigalTrader

Let me explain a model ranking system

If $MA_{20} > MA_{50}$; 1 point

If close > Previous month high; 1 point

If close abv past 52 week high; 1 point

If volume on green days > vol on red days; 1 point

Likewise....

create ur own conditions and assess the stocks across NSE & rank them

sir for example if i trade on pivot points then how should i rank the setup
