Parameters

1.Price structure - higher swing highs & swing lows
2. Momentum - doubled in last 250 days & trade close to recent highs
3. Demand - Higher volume on green bars
4. Volatility - Bigger bars on upside & shorter on downside
5. Relative strength - Outperforming market

> Hello Aneesh, (1) apart from the volume supported HH-HL formation in ATH or 52 weeks high stocks, what other data point u see to shortlist scrip? (2) How do u estimate the holding period for the scrip? Plz guide
