How do you select stocks to invest in this stage of market?

Use 3Bar High on weekly candle to invest with stop at 3Bar Low.. ■

One of the fairly easy and convenient method for investing is 3 Bar High/Low method on weekly candles.

Buy when stock price goes above High of previous 3 bars, continue till trend continues week after week, and sell out when Price goes below Low of previous 3 bars. pic.twitter.com/nnVCbMi84C
