Price went abv the VAH with high momentum and fell back to take support of it. It looks to have bounced off there. Ideally it should continue go north from here

#marico

2/17

price found excellent demand upon the reversal of polarity
#bajfinance

3/17

price made a double bottom pattern and rallied to breakabv the first resistance. It took a minor puase and looks ready to go up from here
#gujgasltd

4/17

finding demand upon testing the past resistance level which broke few days back #bajajfinsv

5/17

Inv. H&S at the bottom and retested the neckline after breaking it #srtransfin

6/17

Price hovering around past resistance elve after breaking it. It should be absrbng the remaining supply here. #balkrisind

7/17

Price is breaking abv the smooth accumulation from the bottom #boschlld

8/17

Price was moving with too many overlappinf candles to the recent high. Price went to test any supply in it. End up as shakeout #cumminsind

9/17

Humongous move upon news and back to test the past resistance here
#hdfclife

10/17

Price just strted rallying after a Stage 1 base breakout. Pullback to 20SMA usually find demand
#Lauruslabs

11/17

tight accumulation at the bottom and price is moving away from that range now #mothersumi

12/17

trend is reversed already as its broke away from bear channel. A huge volume candle with no follow through at all on downside should bring strong demand in it

Price clearly has selling climax at bottom with high volatile candles. A minor pullback to the SC region found demand and at present retesting the tight price region it has at recent swing low

#mrf

TradingView

Huge break away gap which neither found demand nor it found supply. Its at the bottom of the range now where it might bounce off

My standard entry technique is to go long in the scrips from watchlist when it goes abv the high of signal candle With recent trend confirmation point as the SL. This i have demonstrated in many of my past tweets.
