Saregama - once the buying force is turned OFF, no amount of +ve news will be able to lift that up. Selling volumes are too high for this counter. https://t.co/9gqhuokhTX

Saregama - you must analyze this chart for why it failed. A normal pullback is still OK but retracement on high volumes is not a healthy sign at all. that too with breaking below a key 50 MA. https://t.co/gKJQtbkaio pic.twitter.com/iG9FGc70ue
