If you are in the market taking direct exposure in stocks for long term investing, you at least need to learn

1. Basics of Finance

2. Basics of Valuation

3. Basics of Fraud

Else you are putting your hard earned money on fire. Enough books and free resources available.

Wrote this thread for the same leveraging one of my Youtube videos as friends wanted to know where to start https://t.co/NWPjIelLiy

> Few friends are asking for list of books to learn investing topics. Have covered from my side a year back in this Youtube videohttps://t.co/bUb2S3eAVm
> Will break down into parts what needs to be read at least as a pure fundamental investor in this thread
