#NIFTY Blueline is 20M EMA. One of key support in uptrend. From Sept'18 (peak) and Feb'16 (bottom), current NIFTY CAGR: 8.7% and 14.8%. Same in Oct'21, 16% and 21%. If stays at these levels for 1 year, 4.5 year CAGR will be 6.7%. Something to chew on reversion to mean
