## Best candlesticks pattern for Btst:-

### Bullish Tasuki Line Candlestick Pattern

### #StockMarket #Btst #Stocks

It consists of 2 candles.

The first candle is a long bearish red candle and the second candle is a long bullish green candle.

The second candle should open with a gap up and close above the high price of the first candle.

This pattern is mainly formed after a bearish rally or bottom formation.

In this pattern the volume of the second candle should be greater than the volume of the first candle.

It works well for btst and positional.

Can enter BTST before market closing in last 5 minutes.

SL will be below the low of the red candle.

Good time frame:- 15 minutes and 1 day (works best)

Will slowly made thread on all imp candle stick patterns for Btst.

Retweet the first tweet.
