

## Twitter Thread by Satwik Jain

**Satwik Jain**

[@jain\\_satwik](#)

1) Super stoked to go live with my fund, RH #Perennial Fund tomorrow at the beginning of the new financial year. It is inspired by the vision to protect the purchasing power of savers irreplaceable capital, & to increase such value over time in real terms with minimum volatility

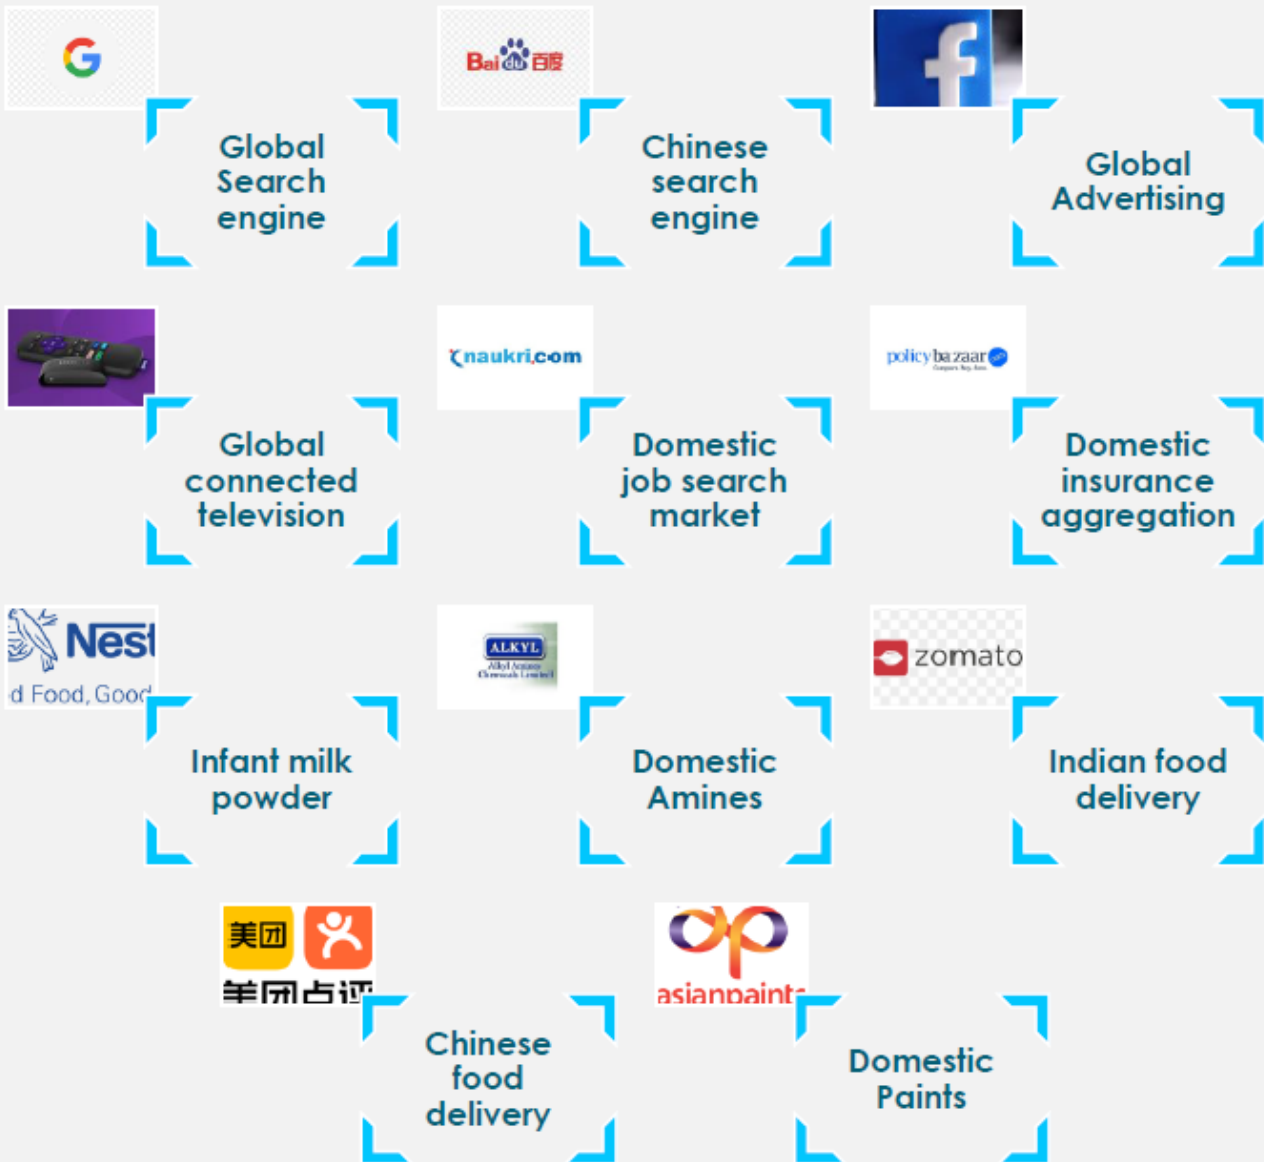

2) Our typical holdings exhibit the following characteristics

- Sector leaders in consolidating profit pool industries with favorable economics with a great track record of capital allocation

- Great accounting quality and corporate governance

- Huge growth potential

## Top players accounting for > 70% market share

3) We do so by identifying Identify great companies with consistency of growth and economic profits and weeding out fraud companies and promoters with dubious history using proprietary forensic accounting tools and fraud search toolkit.

# Fraud Search

**"In evaluating a common stock, the management is 90 per cent, the industry is 9 per cent, and all other factors are 1 per cent."- Philip Fisher**

We run a 150 plus word keyword search to check the intent and vision of the company for minority shareholders weeding out dubious promoters

4) We try to judge companies on the holy quadrangle of wealth creation, namely a) Total Addressable Market b) Market Leadership c) Reinvestment runways d) Management

5) Finally we analyse the competitive advantages of the companies by looking at global wealth creation trends & dissecting the moats of Indian businesses on basis of a) Network effects b) Consumer switching costs c) Intangible assets d) Low cost of production to find #perennials

# Identification of Moats

“All information is in the past, but all value is in the future”

Network effects	Low cost producer in a commoditized industry	Consumer Switching costs	Intangible assets

6) While Second Wave has temporarily disrupted the economic recovery, India's medium to long-term economic outlook continues to remain robust. You are invited to join the session by [@jain\\_satwik](#) (Fund Manager, RH #Perennial Fund) & Vineet Sukumar, (CEO, [@VivritiCapital](#) )

10) In college we learnt asset prices move towards their fundamentals but can financial markets change it? George Soros, billionaire hedge fund manager who broke Bank of England might have answer.

Blog- <https://t.co/ctBVecGNPx>

Youtube with @ishmohit1 - <https://t.co/kw8CmVt4yn>

11) Read on as we try to apply his frameworks of positive & negative feedback loop in Indian and global context taking examples like Franklin Templeton, ARKK Investments, Bajaj Finance among others to portray boom & bust cycles & our invt framework at <https://t.co/xA7uDvwQAK>

# THE PERENNIAL WAY

## LENDING FINANCIALS

Imagine a situation like 2018 where all NBFC share prices fell by 40-50%

It will have to do massive dilution as well as leverage of the company will increase raising concerns with lenders and rating agencies

## COLLATERAL

Loans are based on borrower's ability to service debt.

Valuation of collateral is supposed to be independent of act of lending but it can affect the value of collateral.

## THE PERENNIAL WAY

Ex financials we generally participate businesses which generate huge free cash flows and reinvest them for growth.

In lenders, we stick with the best of best and keep a tab on the price of the businesses as they may be a pre cursor to fundamental deterioration.

RH PERENNIAL FUND

12) We want to extend heartfelt thanks to investors in <https://t.co/dLwRLbQs6U> for partnering us in your wealth creation journey

The fund completed its maiden quarter clocking returns of ~9%

We present a look into our frameworks for perennial compounding

<https://t.co/EEcsz0Zr0t>
