5 ways to find a stop loss level:

- 1) Fixed percentage: 5-10% is enough**
- 2) Breakout level: 3-5% below the breakout level.**
- 3) Moving averages: Below the 10, 20 or 50 MA.**
- 4) Trendline: A multiple tested trendline is a good place.**
- 5) Average True Range: Use 2 or 3 times the ATR.**
