CNX smallcap - Closure look

Looking for max another 100 to 150 fall in smallcap before it reverses from mid diagonal unless we don't hear any bad news from external and internal geographies.

correction is a good time to shuffle laggards, incorrect allocation with performers https://t.co/7HLlfDSHtM

Small-cap and Midcap Index's are in wave 4 correction,

Overall structure is not changed

Continue to hold quality stocks & add in the lower level's periodically

Sell strechted valuations

Shuffle laggard with performer those who have given good results in tough times

cheers
