One of the most remarkable things about #Jews is that they are vocal enough to not let their history disappear from the worldwide narrative. A majority of the world's population is taught about the #Holocaust, and how evil Adolf Hitler was. (1/14)

But, figures like Stalin, Lenin, Churchill, Akbar, and Nehru are still glorified. They were no less than Adolf Hitler.

Being case-specific here, as per various estimates, Hindus have been wiped away from their native land of Bharat in a huge number, it ranges from 300-400 million.
(3/14)

Hindus are much larger in population as compared to Jews but are not united enough to be vocal about their past. Okay, for a moment if we let go of everything till the 19th century, there still is a lot that Hindus have been suffering in their own land.

Our curriculum doesn't even mention the #KashmiriPandit exodus of 1990 which is a recent major event. Even the horrific tales of partition are sugar-coated with the Charkha-Khadi-Ahinsa narrative.

Most of the massacres under Nehru and Indira are not even known to an average Indian youth. How can we expect them to be vocal on newly emerging spots of JIHAD such as Mewat, Bhainsa, and Kerala?

The never-ending and age-old question of #HinduUnity still seems unanswered, and it shall remain unanswered till the narrative changes on a large scale.
(7/14)

But, the way society is being more and more Tamasik by each passing day, the narrative might take too long to change at its current pace, or maybe too late to do something for the cause.

Look around you, identify the under-informed and the IGNORANT HINDUS. Do your bit in educating at least 2 or 3 of those. But make sure you are well-read about your history and culture as well.
