@NVTaraStrong

**The reason why Republicans, namely Mitch McConnell @senatemajldr, will not consider the steps other first world countries have taken like monthly stimulus payments to their citizens, is because those are successful socialist based economies. We are a capitalist based society /1**

in which our government isn't concerned about the welfare of their fellow citizen but moreover the welfare of their bank accounts. Being a member of congress in The United States is a business. They do not see people that need representing, they see products that need to be /2

utilized for profit. That's what we are is products of profitability to the Republicans. If we suddenly are all happy and getting along and well taken care of, they don't have the means to stir up drama and continue to milk donors for money. You see, it is our money, /3

not theirs, but they are certainly not going to let us have it. That wouldn't serve their profits or their partners. Corporate America is hand in pocket with the Republicans. The richest 1% got over a trillion dollars richer since February, Congress sold off stocks and bought /4

new ones that they knew would either do poorly of they kept them or do great if they bought them, based on the info they got about the pandemic. They know we all need help, they simply don't care. They know the virus has killed 305,000 American Citizens in the USA and /5

they simply do not care. We are expendable. There are more than enough of us to support their profits regardless of the amount of people the virus will kill. They knew that they would have the best medical care if they did get Covid-19 and that they would get the vaccine /6

first, if and when it came along. The Republican @GOP needs to die out. They are being eaten alive by the Maga Party from the inside. The problem with the MAGA party is that they don't care about profits so much as they care about being loyal to their savior, the God Emperor. /7

To these people, anything that goes against their savior, God Emperor Donald Trump, is heresy. You are either 100% behind him, or you are deep state. The problem is that the Trump Virus is not just Covid-19 but it is also the deepening roots of Republicans falling into MAGA. /8

The problem with Republicans falling into MAGA is that they still wield power over their base that has always been about profits, but now they are using their base to rally for secession cries and cries for violent civil war. In my quiet little capitol city of Carson City, NV /9

Today at the capitol grounds, the local Proud Boys chapter was there, yelling white power obscenities and mingling with regular MAGA fiends. Cars would drive by with Biden stickers and they would shout and chase them. The local news site had reported that some of the PB's /10

Had chased people in their trucks for being Biden supporters as they saw it. They were there with guns and loud violently leaning rhetoric of the need for uprising and ending the America we've known until now. This Trump Virus is spreading. January 20th 2021 may not be enough /11

I'm beginning to believe that 4 years was 4 years too many for Trump to have the reigns. I'm not sure even Biden and a 50/50 senate with Kamala Harris as a tie breaker will solve this ideological nightmare. This is the Fourth Reich. Trump studied Hitler his whole life. /12

He aims to succeed where Hitler failed. /end
