So really simple questions

And there are so so many

Why are concerns over race, gender and sexuality put into air quotes e.g. "fashionable"?

Is "fashionable" meant as a derogatory?

Who are you selling this shite to when you write it this way?

When did the government become "too focused" on race, gender and sexuality issues?

Define "too focused" ?

Will now "pivot" - what you mean from today 17th December 2020?

Why could you not focus on "poverty and levelling up" at the same time as equality issues since some of these issues go hand in in hand after all?

Who and what are you "levelling up" from?
