18 EVERYDAY ITEMS YOU DIDN'T KNOW THEIR PURPOSE

Thread..

1.The Mini Pocket On Your Jeans

When you buy a Jean trouser, don't you wonder what this pocket is for? Well, today is your lucky day! It's where you were supposed to keep your pocket watch when jeans were first invented

2. The Hole In Your Pan Cap

Kids might likely put this covers in their mouths so manufacturers took measures to prevent them from suffocating by placing a hole in the cover so that if it gets stuck in someone's throat, they'll still breathe air into their lungs

3. The Hole In Your iPhone

You'll notice a little hole next to the camera on your rearfacing camera. It is actually a microphone. It allows you to record sound when your camera is turned around

4. Hole in padlocks

The hole is made for pouring engine oil inside the padlock to enable it to be lubricated if rusty

5. They basicaly let your fingers know where the home key is without looking down so you can type quicker than usual

6. Arrow On Your Gas Gauge

Forget what side your car gas tank is ? You don't have to get out of the car to check. The arrow on your gas gauge points to it.

7. Soda Tab

The tab in your can drink is to be used to hold your straw in place while you sip, stop turning it aside

8. Lines on Red Cup

I bet you never thought the lines where important right? Me too
Well, the lines can be used a liquid measurement for different kinds of alcohol

9. Silica Gel Packets

STOP THROWING IT AWAY! It Helps to suck moisture out of its immediate environment to keep it dry cos it absorbs humidity in an enclosed environment up to 50%.

10. The Holes in the Side Of Your Converse Sneakers

The holes have multiple functions. They allow air into your shoe and you can also use them to tie your shoes in different: ways

11. Holes In Airplane Windows

These things have two functions, one is to compensate for the difference in air pressure as the altitude changes and also prevent the window from fogging

12 The hole in your pots handle and fry pan

Thought they are for hanging them? Nah, Not just that alone
Next time you need to put down your utensil just put it in the hole and its will hang over the pan to prevent any mass

13. Pasta spoon

STOP THROWING THIS SPOON AWAY. The main purpose is to drain the water out of spaghetti. BUT the hole signifies the size of one person's portion of spaghetti. A handy way to remember portion and size without scales

14. Zigzag on one side of bobby pins.

The zigzag is designed to go on the bottom, closest to your scalp as it grips the hair better. Who would be known?!

15. Notebook Margine

Margins weren't invented so your writing can be on a straight line, margins were created to safeguard what youve witten on the paper so you don't lose your write up to Rats by leaving blank spaces around the edges for the rats to chew
