■■What I am going to write / publish does not aim to impose something on anyone, nor to convince them of something to go against someone's opinions or attitudes.■

■■This represents personal observations, interests, something that I personally came across and about which I consulted with some in order to clarify doubts, but also the information that I came across!■

■■What I was looking for were earthquakes, and my attention was drawn to the first information about the earthquake in Croatia from March 2020, which I learned was artificially caused!■

■■Also as an artificially caused earthquake is the earthquake in Turkey and Greece on October 30, 2020.
At the very end of 2020 and the beginning of 2021, Croatia was shaken by a new devastating earthquake, the towns of Petrinja and Sisak, which was felt in several countries!■
