@kanya_matang

I am somehow now getting the the reason why all WWW based SM platforms went berserk simultaneously! Nope it has nothing to do with the election results , rather its a bigger plan a deception ! Here it goes .. its a thread

The deletes (dark eeeellllliiittttteeesss) were living a happy life in shadows while controlling the world via their puppets such as religion and money ! Then there was a disruption in their paradise , it was the rise of internet

They didn't take it seriously in the beginning, but it gradually started connecting the world , people from distant places could communicate with each other share ideas and culture , and then twin tower happened when people first took to the internet to expose Deletes

By 2012 Expose of deletes on the internet reached to a dangerous level .. there were too many awakened people (deletes call them conspiracy theorist) now all across the world , who understood their shenanigans

Deletes had to stop it ! This technology and specially teh world wide web was the biggest enemy of their long cherished dream of controlling the whole world ! They needed technology for it but the technology was proving to be a double edged sword due to it world wide web nature!

Deletes wanted the technology for control of human race but sans its world wide nature !
So a flu demic was planned with all complaint govts in the world (btw all govts and leaders are compliant including Modi and Trump)

A very proven strategy of control used by deletes has been to create a problem first , make people desperate so that they ask for a solution to the problem and then provide them a solution that serves the deletes

This is what happened in case of flu demic .. they closed everything people got desperate and they provided a solution in form of Dna /rna jabs whose effects no one knows except for deletes !

So now coming back to the topic of all sm platform getting berserk !
So problem started when around 2008-9 SM plaforms started getting popular and became a huge means of exposing deletes and their dark deeds

And also SM's world wide nature kind of converted it in to the composite mind of humanity full of ideas and creativity ! The world became a village ! The same world which deletes for thousands of years kept divided on various fault lines

This world wide web had the potential of destroying all fault lines provided Deletes had let it grow organically ! But why would they let a threat to their existence grow ? So around 2011 they started to plan a world wide crisis situation

This crisis situation was to be used to hit multiple targets in one go !
These targets were -
1) Economic reshi(e)t of the world to make it more controlled with very few personal liberties to people
2) establishment of a surveillance state all across the world

3) control of third world countries natural resources by controlling their population
But one thing that stood in the way of achievement of these targets was world wide web nature of internet and social media!

Www was their biggest hurdle ! So to control it it had to be monopolized ! So they started drawing users from across the world to their chosen/acquired platforms killing all competitions ! Servers of all these SM platforms were centralized

Web browsers and also the hardware for phone and OS were monopolized !
Then all 2020 drama happened !
Make no mistake , every SINGLE political party and political leader is a slave of Deletes, so is media , religious leaders and everyone else

All these big SM companies are based out of USA !
Trump is playing as per the script given to him by the Deletes, alm his actions are targeted to keep his supporters sympathy for him alive and at the same time kill the biggest hurdle in the way of the great Reshit

That hurdle is world wide nature of SM and the internet !
This can be achieve only by destroying these companies that deletes already own !
But how to destroy them in one go without public outrage ?
Well only way to do so is to make Public against these SM platforms

Which is why all SM platform suddenly started doing things so that people start hating them !
They went ahead to mass delete the accounts (which works well for DeLetes)

Here i would like to mention that US election fiasco is well planned with active participation Of both parties for both parties and their leaders work for deletes!
I realized this game when i saw the tweets done by Tump from his potus account

He clearly says he will bring section 230 into action and stop functioning of these world wide web SM platforms's functioning , and this is what will happen in coming days !

Once these main www SM platforms are gone each country will develop its own SM apps which will be closely monitored by Deletes compliant govts of the country !

One country will block another country’s app in their country sighting security issues (tik tok ?) and so we are heading towards a highly localized internet!
Vocal for Local ka nara kahan se aaya samjhe ?

These localized internet will be best for surveillance purpose ! Forget about freedom of speech there will be none !
Deletes have kept your illusion of freedom for past 70 years , they can’t continue it any longer

You humans are despicable free eaters for them and either your enslavement or you annihilation is their aim ! Only “essential workers” will be needed !
To achieve this their DNA /RNA based jabs are ready , which uou are going to stick in your arm very happily

So good luck to you Humans !
Your fate is nearly decided and is coming soon !!
Keep fighting with each other !
Thread ends !!
