**Something big just happened over the North Sea... I DONT KNOW WHAT THOUGH.**

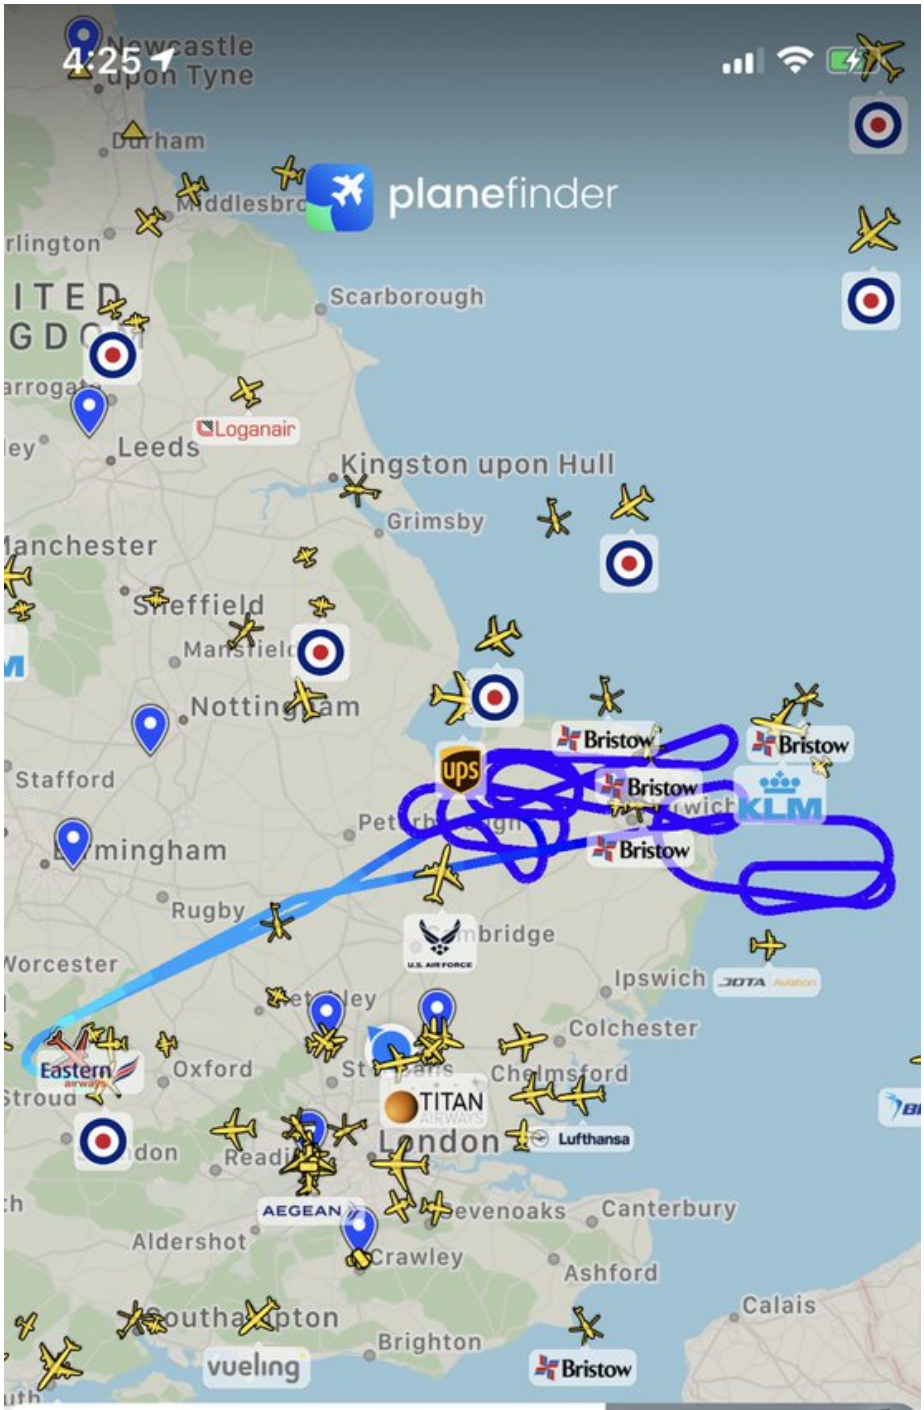

**I'll post the air traffic screenshots below in this thread.**

**It's certainly NOT what the media reported at 2:42PM as the jets were still on mission at 4:25PM.**

Theses were also supported by four privet jets that seem to be scanning the area of the incident. All took off and landed from Newcastle Area at the same time.

All these flights are inconsistent with today’s Press Release on the “Sonic-Booms” heard over southern UK.

I tracked these planes after I heard and felt the Boom directly overhead. They went north to intercept what ever happened in the North Sea.

THEY DID NOT LAND AT STANSTEAD.

Their was also a USAF Aircraft involved as well which returned from the incident Zone at 5:05PM

The Press Release was posted as the Jets Departed towards the North Sea.

While they were clearly still in the sky. https://t.co/zCI3yBZX6V
